

The HON Company's Initiate workstation is simple, smart and sustainable. It's simple because it's easy to order, install and reconfigure, with few parts and pieces and a universal connector that saves time, money and inventory.

It's smart because of its durable construction, quality fit and finish, timeless design, and ease of reconfiguration. And it's sustainable, thanks to recycled fabric selections, Nature Core™, an exclusive plant-based fiberboard (an industry first), and low emissions (the first panel system to earn SCS Indoor Advantage™ Gold certification).

STANDARDS AND EXCEPTIONS

All Initiate products and 38000 Series* stack-on storage and doors are included in HON Daily 5 except:

- Clear and frosted glass raceway/cableway panels; includes top tier, double top tier, triple top tier and work surface-height glass panels
- Half-round work surfaces with edgeband
- 120-degree corner work surfaces with curved user edge
- NDS6836 68" sliding privacy screen
- ND8142 81" door and frame
- HES410 electric strip
- NSLSKTVE panel sales kit
- Single- and double-sided power panels

* Eligible 38000 Series product limited to stack-ons, flipper doors (excluding fabric-covered), mounting brackets, conversion kits, tackboards, additional shelves and shelf dividers.
